Overview:

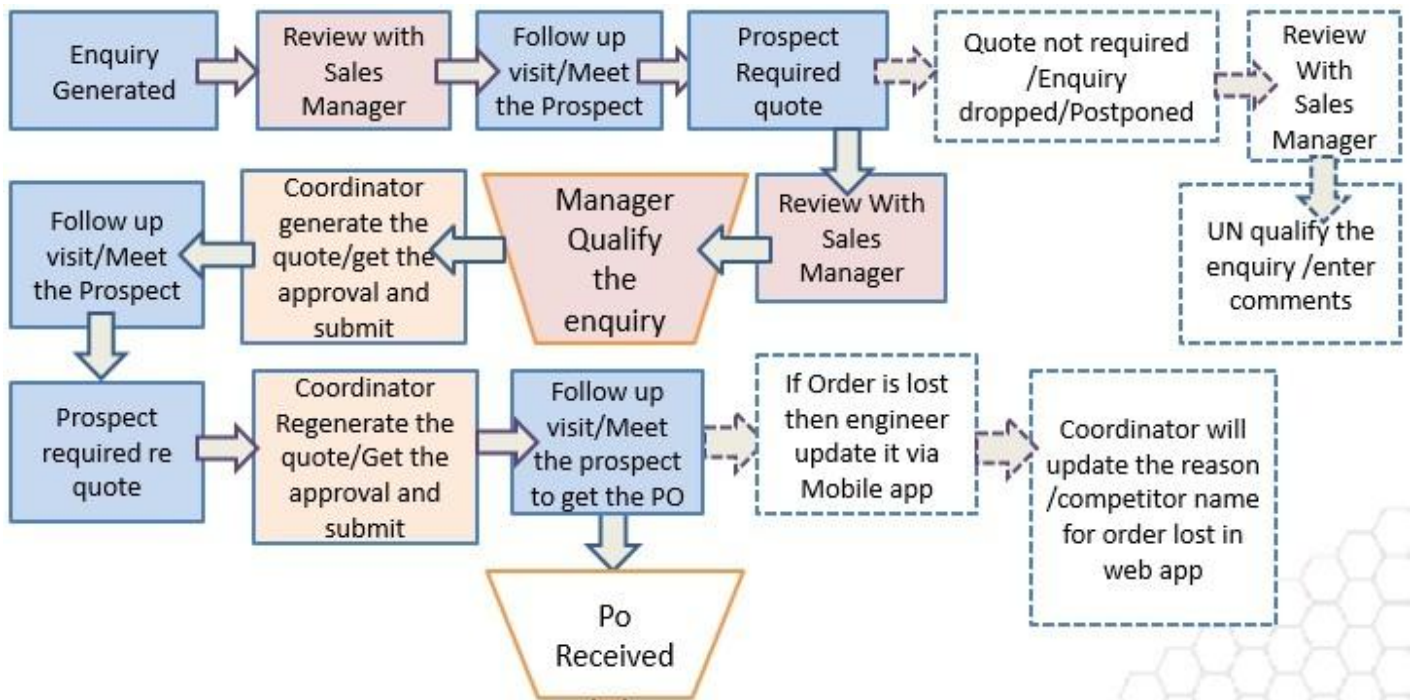

This document explains about various flow of activities carried out by Dealer sales team in DPartner Equipment Sales and how they update activities, status tracked by different stake holders.

Work Flow for Equipment Sales:

Sales visit logging to PO Received (For New Customers)

Direct Enquiry logging to PO Received (For Existing Customers)

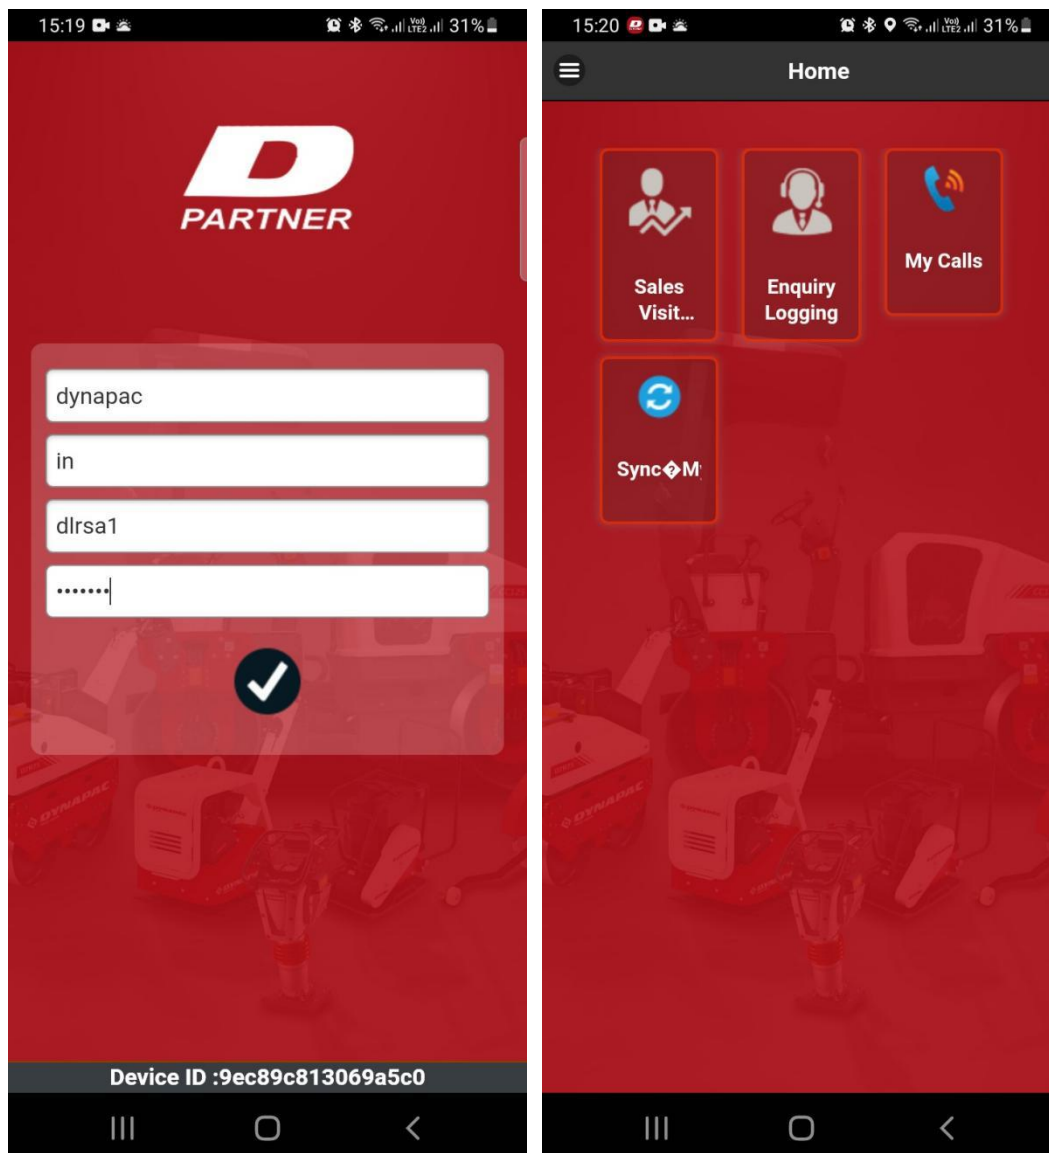

Creation of Visit by Sales/Service Engineer from Mservice app & Auto generation of Enquiry:

Any Mobile user can download DPartner app from Google Play Store or App store (iOS). After installation of the app, the user needs to share the device id (visible to the bottom of app screen) to OEM Coordinator to enable the access and this device id is unique for individual users. Once access is given fill the details like: Client ID, Country Code, Username and Password and click on register for registration of the app as visible in the below image.

For example:

Username: dlrsa1

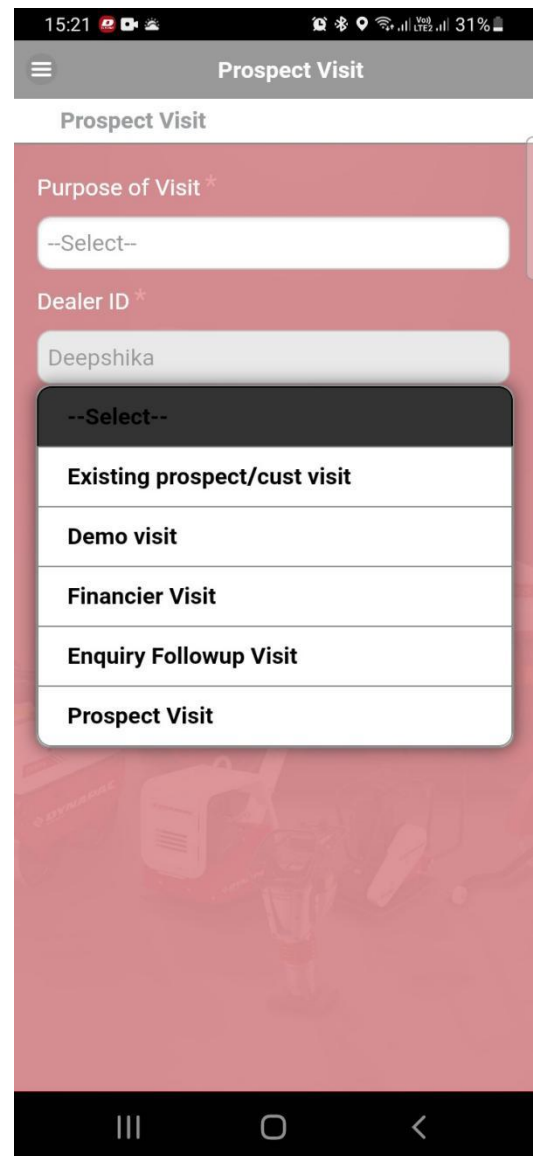

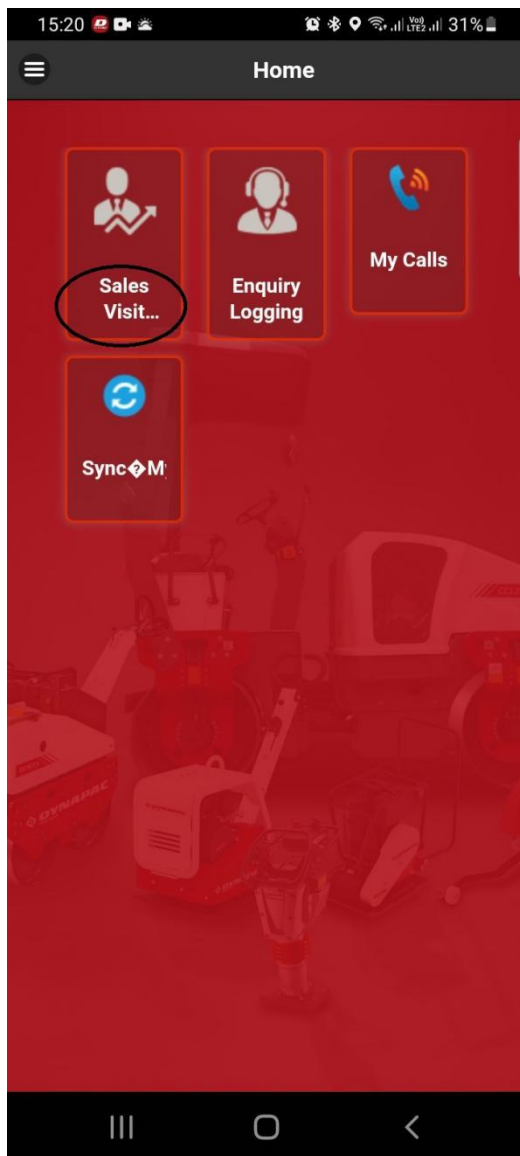

Password: *****

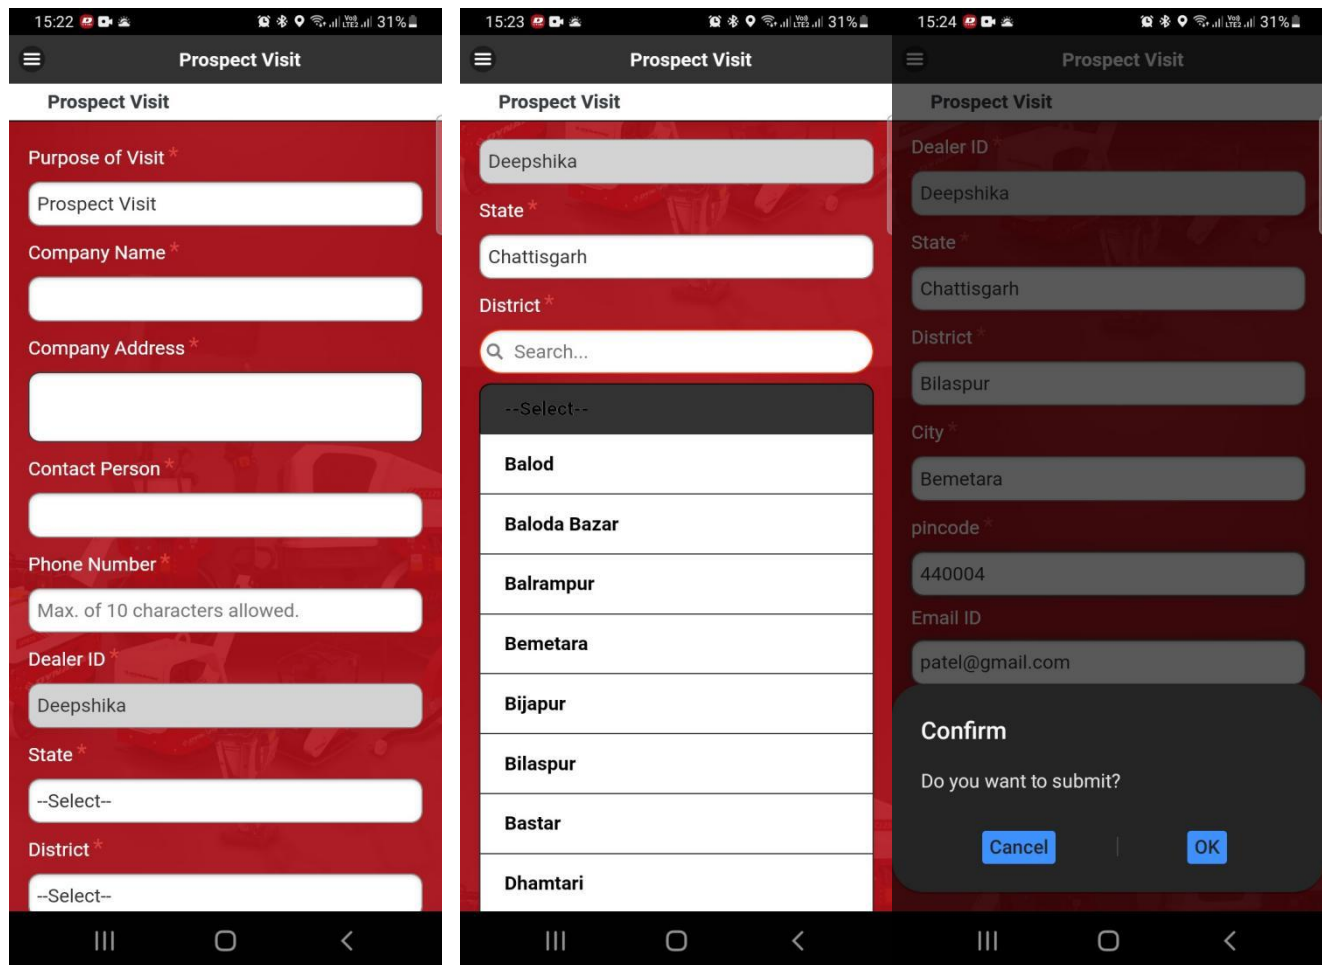

After registration, the Sales engineer can log a Prospect Visit for a new customer from **Sales Visit Logging** or can generate an enquiry directly from **Enquiry Logging** options available on home screen.

Simultaneously, any Sales visit or Equipment enquiry logged from Dealer sales coordinator web login also can also be viewed & processed further from a particular Dealer engineer's login, if it is assigned to that particular engineer.

When clicked on **Sales visit logging** option ,it asks to select the **Prospect Visit Type** from the list of options available as drop down as shown in below screen ,& need to click on Tick button to continue filling visit details

Sales engineer needs to fill up the mandatory fields marked with (*).After filling up all necessary information. Then the sales engineer needs to click on Tick button at end of page & should click on OK to confirm.

After confirming the submitted details, a Visit number will be generated .The Visit number will start with a prefix **V**. Simultaneously, the system will add this customer info in the database with a unique customer id & that customer id can be used for **Direct Enquiry** logging either from Sales engineer's mobile app or from Sales Coordinator's WEB application.

The newly created Visit number will appear under "**My Calls**". Sales/SE Engineer need to click on **Sync My Calls** to refresh the calls. The new visit generated will be appearing in "Assigned status".

Once the Visit number gets visible in My Calls, the Sales engineers can do **Trip Start** by clicking on the visit number when he starts his journey to the customer location. **Trip started successfully** msg flashes at bottom of screen. Once the Trip start is done the Visit color Automatically changes to “**Green**” indicating that it is the “**ACTIVE CALL**” and it appears at the top of other calls.

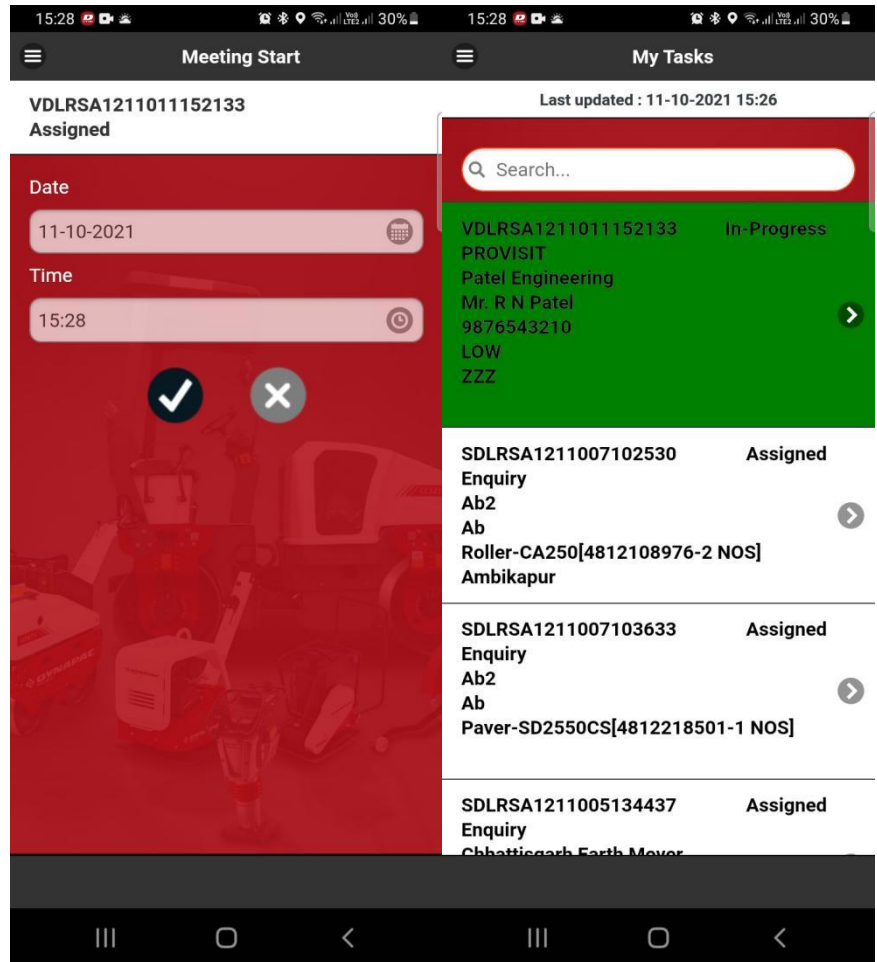

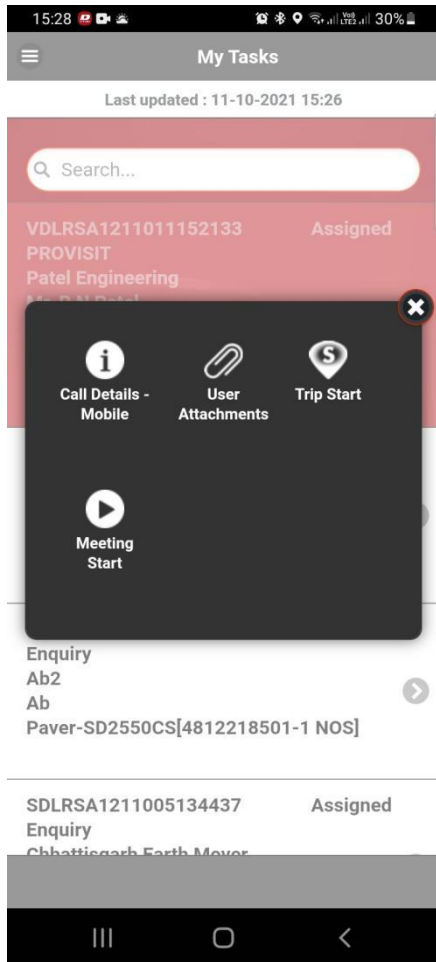

When the Sales engineer reaches the site/Customer location, He can click on the “**Trip Finish**” option. A msg flashes at the bottom of the screen as “**Trip finish successfully**”. Engineer can do **Trip Start/Finish** multiple times to record their trip details if there is a break journey.

After reaching to the prospect customer, Engineer can do **Meeting Start** to start the meeting .Meeting date & Time are Automatically displayed on screen. On clicking tick, “Meeting start successfully done “ message flashes at the bottom of the screen

Once the engineer does the Meeting Start, the Visit number will again go back in Green color & the app will not allow the sales engineer to proceed for another visit. The status of the visit will also change to “In Progress” now

During the meeting, the sales engineer can note down the customer’s requirements in **Meeting Report** by clicking on that visit.

The Sales engineers need to fill up all the required information marked with (*) & also record their location by clicking on **Tag My Meeting Location**. After clicking on Tag Location, the app will fetch location from the Google Map. The arrows Located in the middle will help engineers to surf through the Previous & Next pages. And the outer arrows will help Engineers to directly go the first & last pages.

○
<

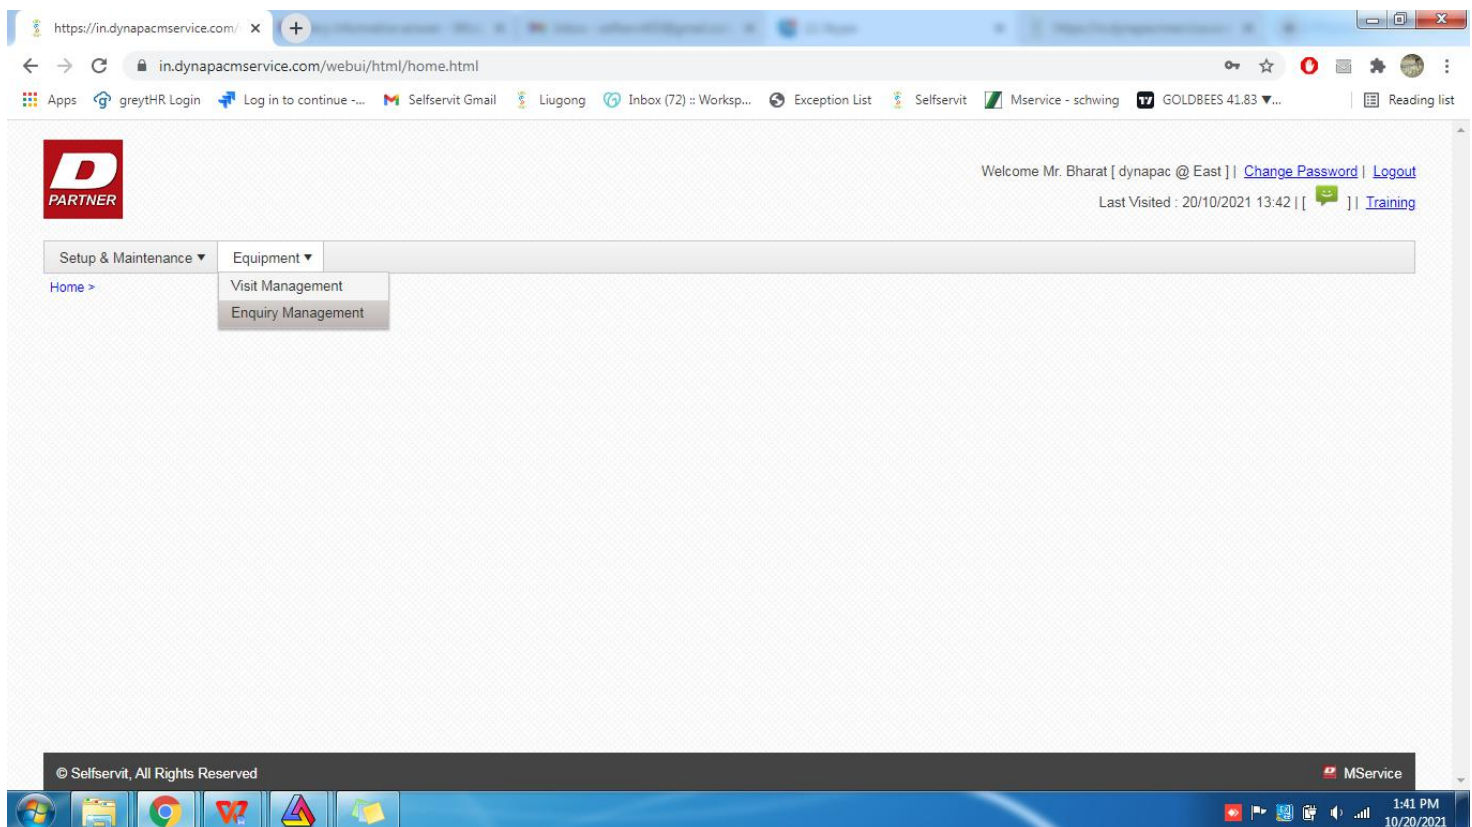

Now in WEB login, the Sales Manager or the Dealer coordinators can **Qualify/Unqualify** the enquiry Auto-generated based on the **Sales Visit's Meeting report**.

Sales Coordinator/Managers can do web login via their credentials.

The site URL is: <https://dpartner.dynapac.com/> or <https://in.dynapacmservice.com/>

The Sales Manager/Sales coordinator needs to click on the **Enquiry Management** under **Equipment** menu.

The new Enquiries will be shown in **Assigned** status starting with **SA**. The Sales Managers can view the enquiry & click on The Approve button under Action menu in order to **Approve** it.

13.233.91.138:82/webui/html/home.html

Equipment Enquiry Management

Enquiry List

1 - 3 of 3 items

Actions	Classification	Customer Name	Contact Name	Contact #	City	Status	Sales Engineer	Next Authorisor	Model
- View - Edit - Attach Documents - Approve - Return - Reject	Hot	Megha Engineering	Mr. Somnath Bagchi	9876543210	Durg	Waiting for Approval		Mr.Sales Coordinator	CA255
		Upendra Kumar Patra	Mr.Santosh Kumar Patra	9437207242	Koraput	Waiting for Approval	Mr.Sales Coordinator	Mr.Sales Coordinator	CC125
	Hot	CHAHAL CONSTRUCTION PVT LTD	MUSFIK	7889487294	JAMMU	Waiting for Approval	Mr.sumit shrivastava	Mr.sumit shrivastava	CC125

Sales Manager can enter comments if any in the dialogue box & submit. Then needs to click on **OK**, when popup Shows **"Approve successfully done"** as in below screen

13.233.91.138:82/webui/html/home.html

Actions	Classification	Customer	Next Authorisor	Model
	Hot	Megha En	Mr.Sales Coordinator	CA255
	Warm	Upendra K	Mr.Sales Coordinator	CC125
	Hot	CHAHAL CONSTRUCTION PVT LTD	Mr.sumit shrivastava	CC125

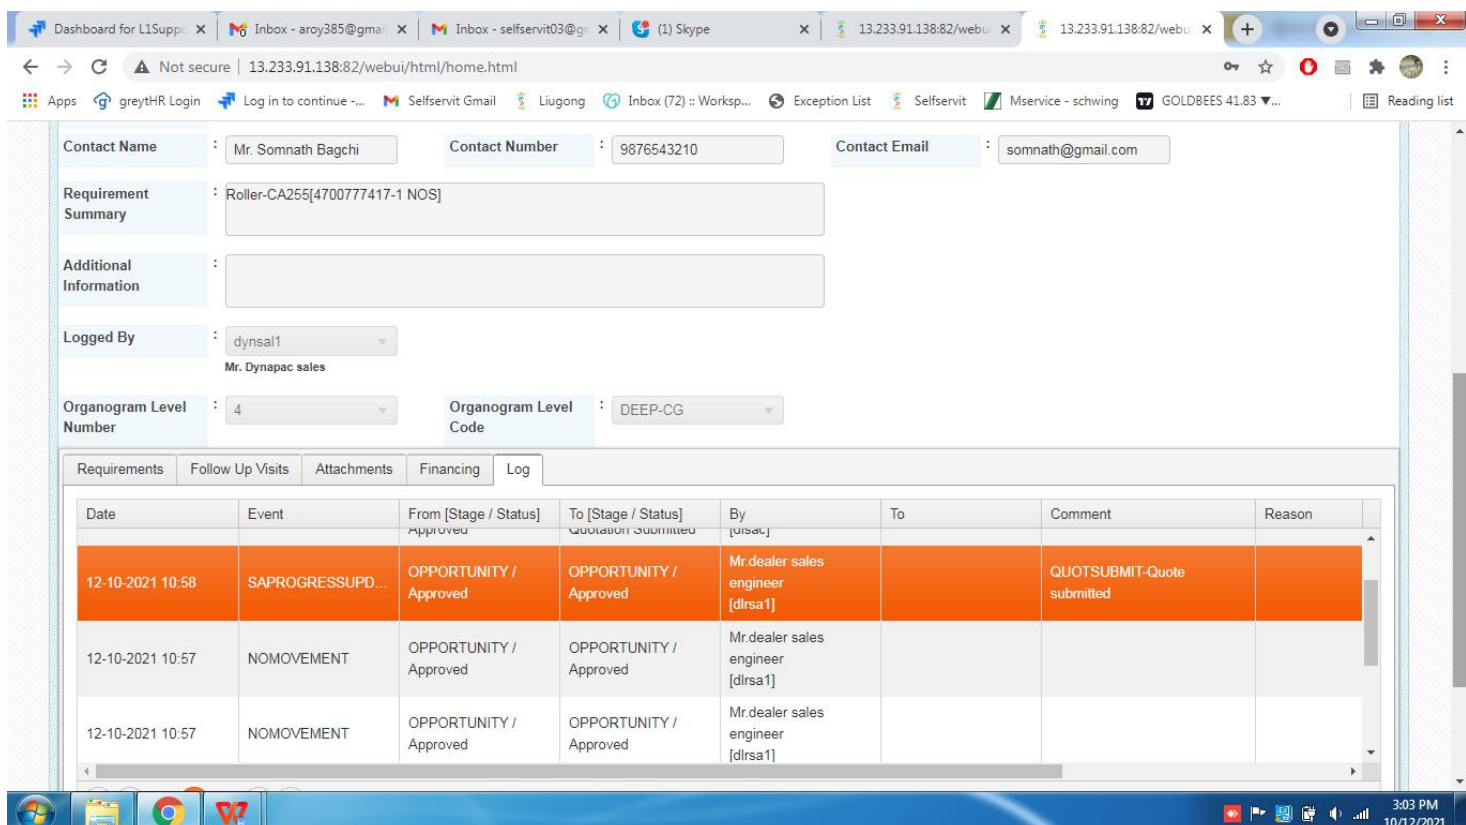

Then the qualified entries will be updated in the sales engineer's mobile app under My Calls. The enquiry status is now Changed from **Assigned** to **Approved** as seen in the below image.

By clicking on **Progress Update**, the sales engineer can update his activities (Such as Quote submit, Advance received, FI Done, Financier Case In, PI Given, DO Received, Order Lost) done for the enquiry & also can up upload the picture from Attachment option if any document available for that action. Any comment can be given the same time.

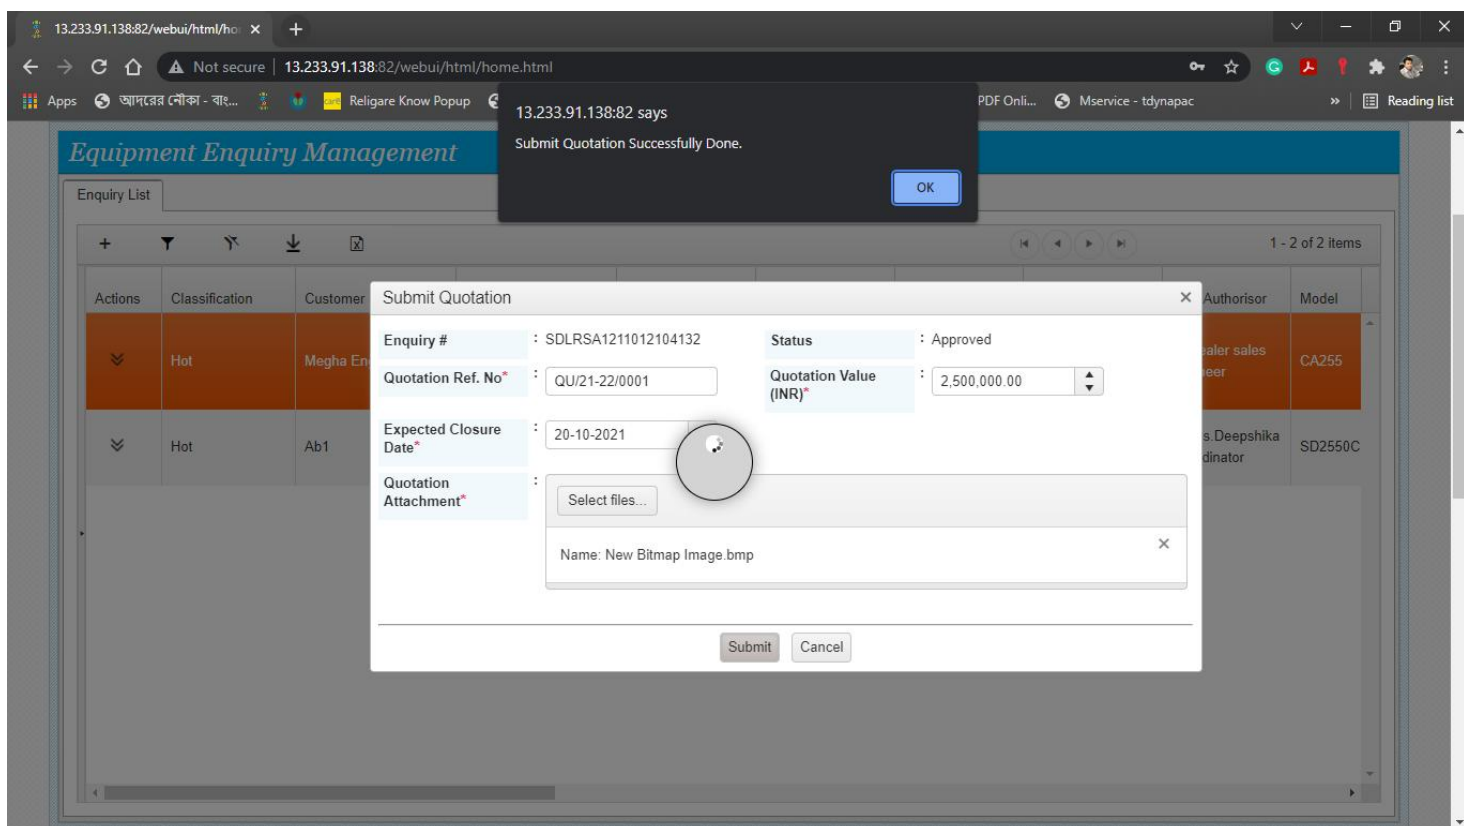

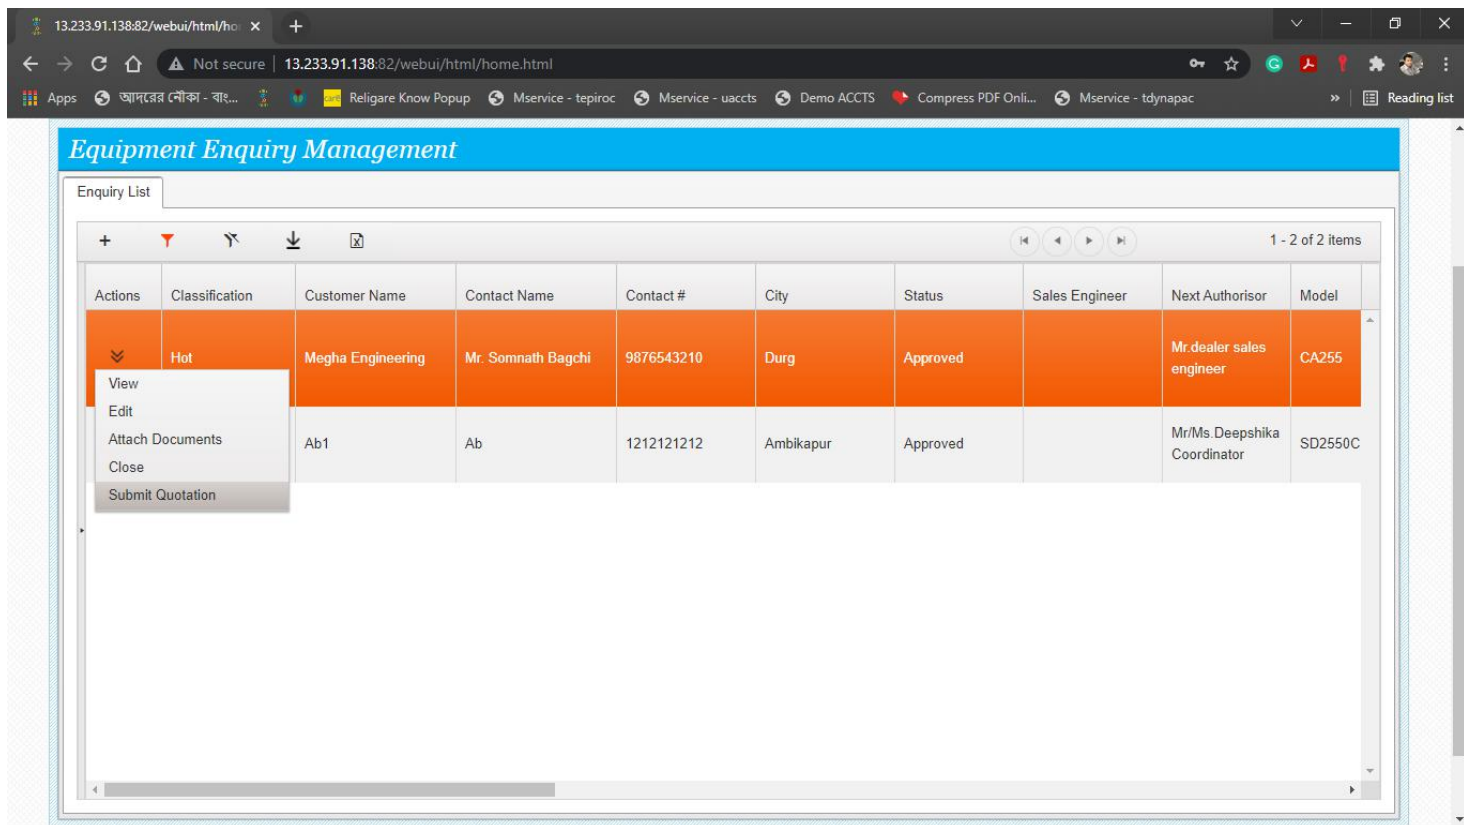

The Progress updates done by Sales Engineer can be viewed by Sales coordinator in Equipment Enquiry details under logs

The Sales Coordinator can check the engineer's activities & comments from his/her WEB login under enquiry Logs & can

update the enquiry status further.

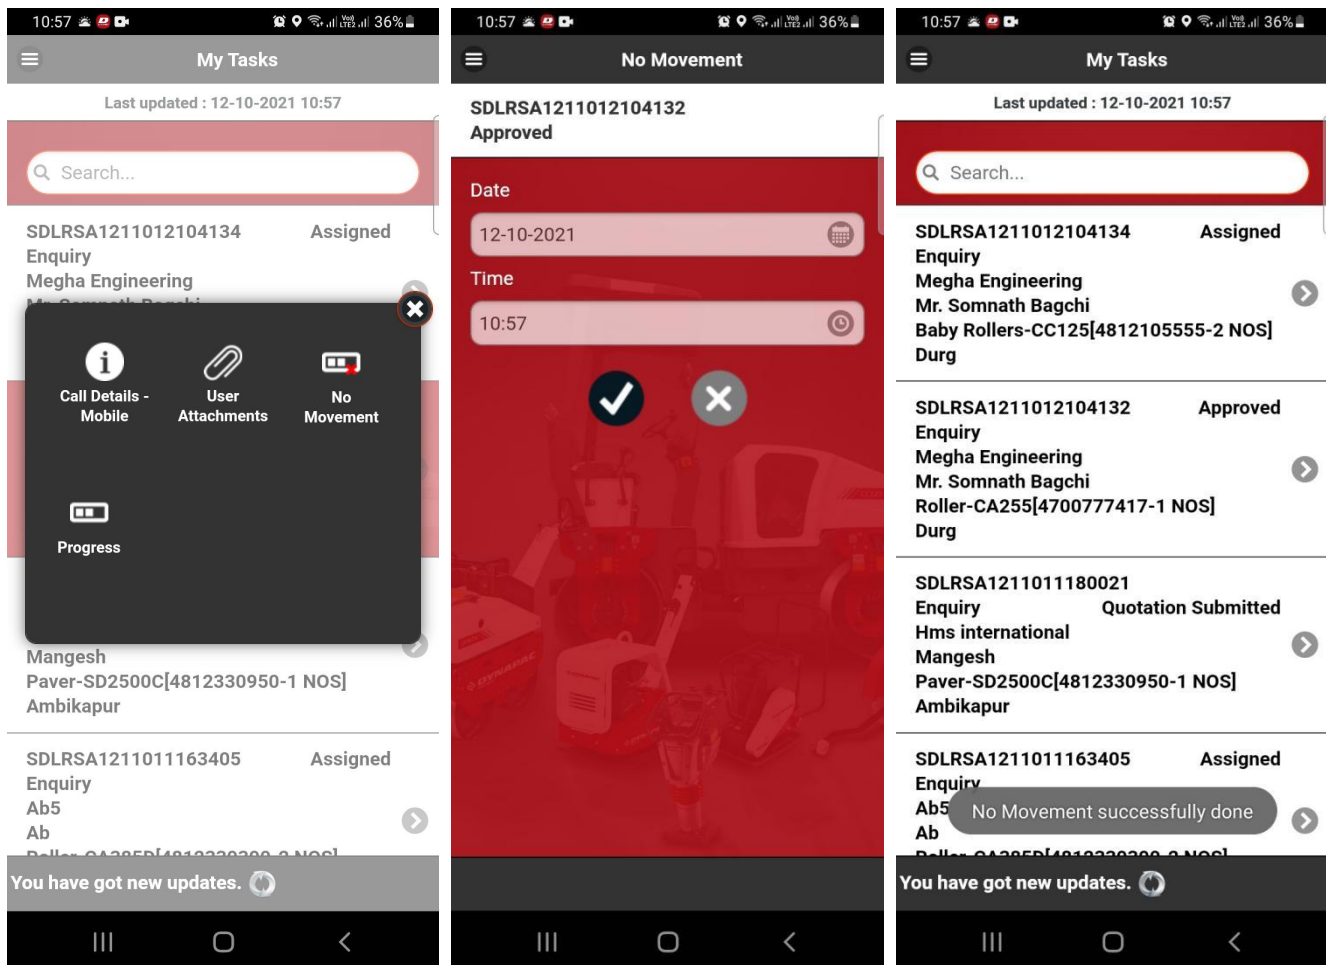

After the logging, the sales coordinator will view the comments given in the enquiry by the sales Engineer & update the Relevant status from the action button. By this way, the sales coordinator can change the enquiry status till **Billing Done** & Each status update by the sales coordinator will be visible in sales engineer's mobile app as well.

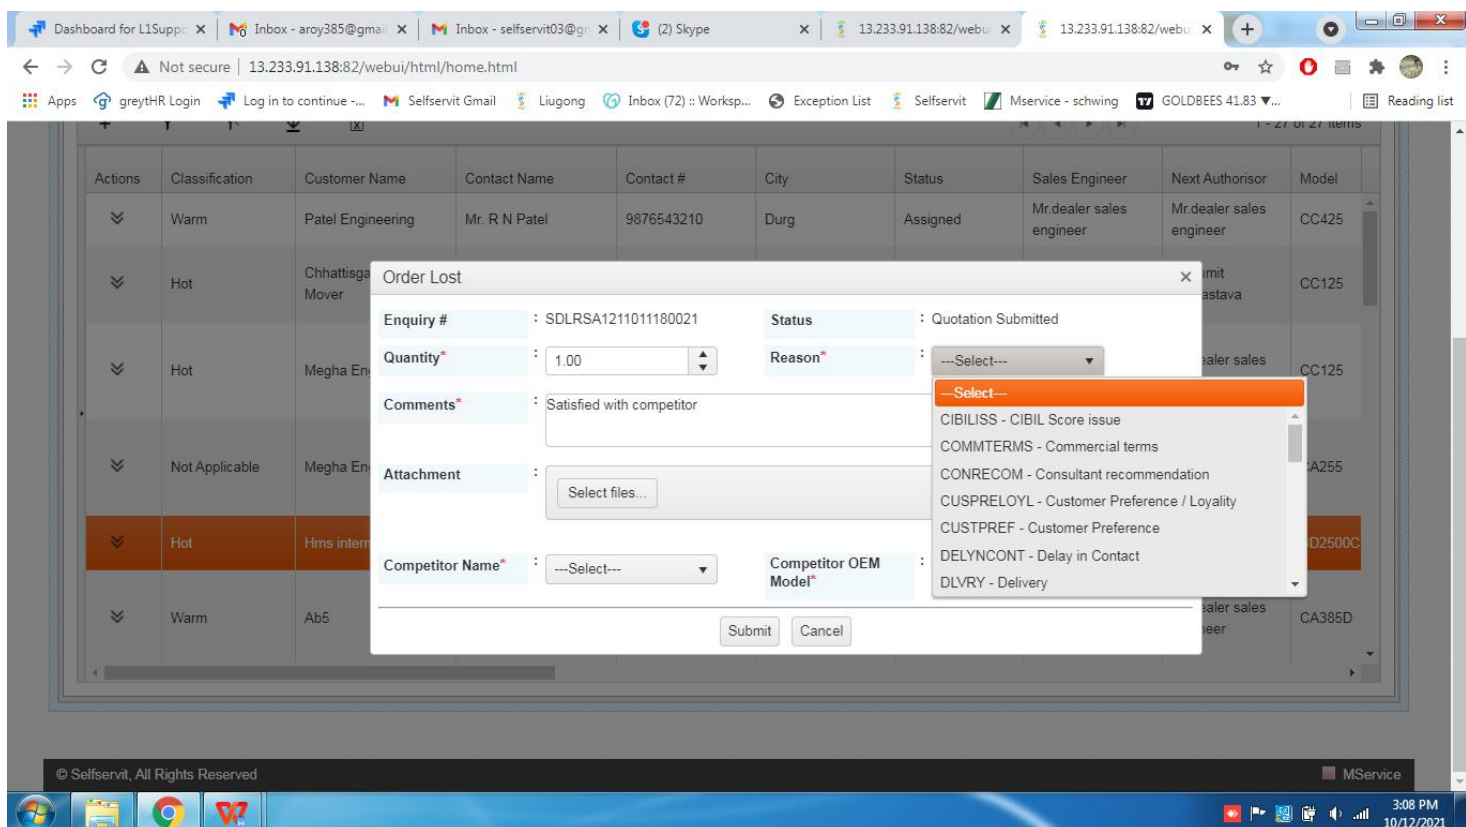

As shown in the above images, the Sales Coordinator has changed the Enquiry status from **Approved** to **Quotation Submitted** after information received from sales engineer's comments. And the same status change is reflecting in Sales Engineer's mobile app as well in below screen.

The Sales Engineer can also update the status as **No Movement** if there is no progress made for the enquiry for the day.

In case of **Order Lost** informed by the Sales Engineer, the Sales Coordinator has to mention the Lost Quantity, Reason, Competitor Name, Competitor OEM Model & comments if any in the **Order Lost** screen in the web.

After the **Billing Done/Order Lost**, the completed enquiry cannot be seen in My Calls of Sales Engineer's Mobile app.

Please Note: **Order Lost** option will be available before **DO Received** in Sales Coordinator login. (Please see The app flow given in page no.02 for reference)

Direct Enquiry Logging By Sales Engineer from MService app:

The Sales/SE Engineer can directly log an enquiry from **Enquiry Logging** option given in the mobile app for an Existing Customer

The sales engineer has to fill up an **Enquiry Logging** form similar to the **Meeting Report**. After tagging the location in the 1st page of that form, engineer has to search & select the customer. Engineer can search the customer by typing the Customer name or the customer id in the **Prospect Name** field & relevant customer names will appear in drop down. Then The engineer needs to select the customer name from the drop down.

After submission of enquiry details, an **Enquiry** number will get generated & auto-assigned to the Sales Engineer. The Newly generated enquiry can be found under My Calls starting with prefix **S**.

Enquiry can be processed further in app by sales Engineer, after getting **Approved** by the Dealer sales manager/sales Coordinator.

The sales engineer can update his activities from **Progress Update** option or **No Movement** option in app & the sales Coordinator can change the enquiry status till **Billing done** or can do **Order Lost** from his login.

For Any open Enquiry, Sales Engineer can create a **Follow up visit, Demo visit or Financier visits** also, if he is visiting The customer for further progress on that enquiry.

For a Demo Visit & a Financier visit, meeting report is not available. These Visits has only **Trip Start---Trip finish--- Meeting Start ----Meeting finish options**

To search for Existing Enquiry of a customer, customer name should be typed & click on search, automatically existing Enquiry Number of that customer will be available in dropdown
