

Suggested Instructions to Transition Service engineers from MService to DPartner

Let the Dynapac coordinator set a time target for transition (like 01-Nov-2021)

Let Engineers Finish off any existing calls in MService

Let Engineers Download DPartner from store

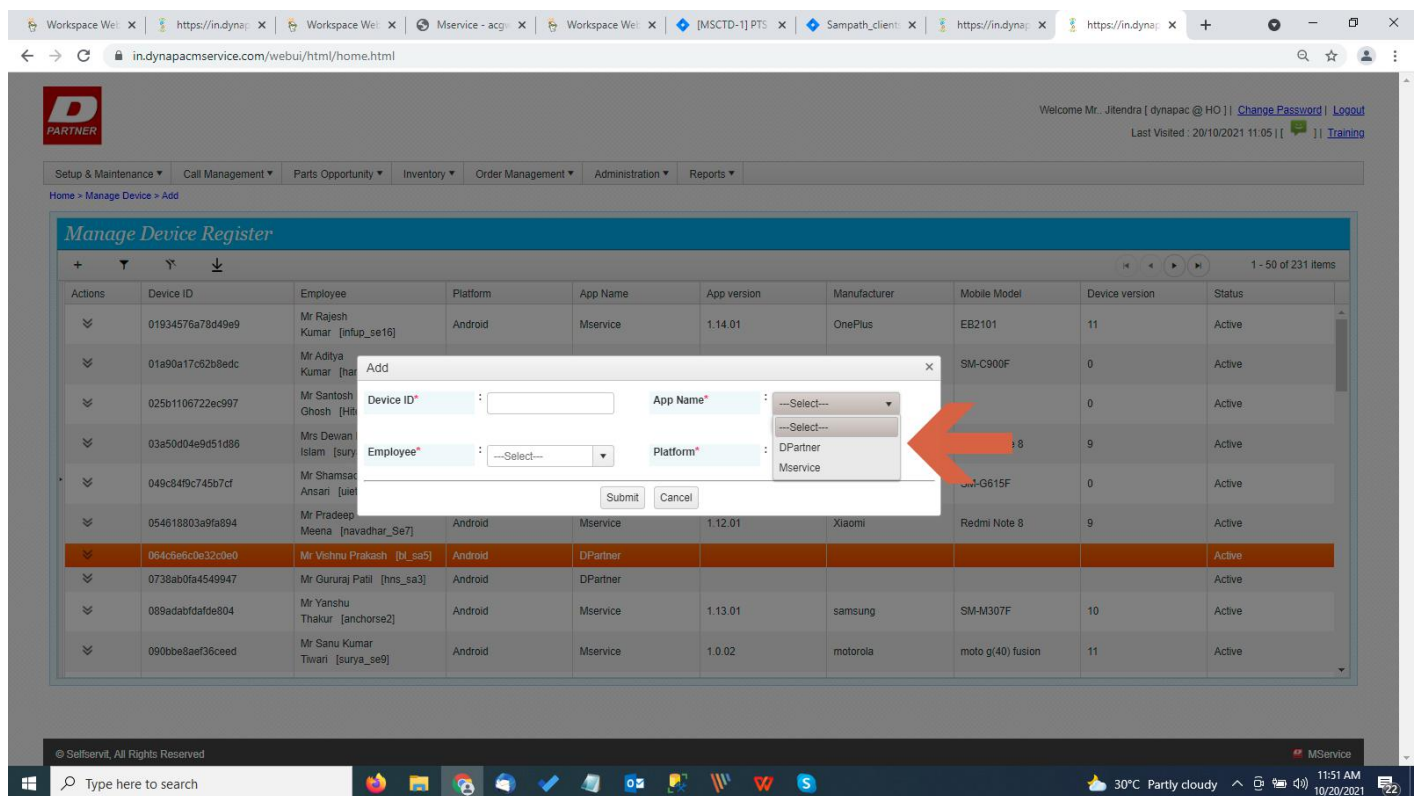

Let them Note down the device id shown in DPartner app

Let Dealer service coordinators collect all service engineer's device id and Send a list to OEM coordinator (Jitendra)

Let Jitendra consolidate all device id in one (or two) shot to MService support to upload device-id with App name as DPartner (Only for Bulk Upload)

For the subsequent maintenance Jitendra can login to web app and add the DPartner device id for individual engineers as below and Activate device

Weblogin -> Administration -> device register->

Manage Device Register

Actions	Device ID	Employee	Platform	App Name	App version	Manufacturer	Mobile Model	Device version	Status
	01934576a78d49e9	Mr Rajesh Kumar [infup_se16]	Android	Mservice	1.14.01	OnePlus	EB2101	11	Active
	01a90e17c52b8edc	Mr Aditya Kumar [har...]					SM-C900F	0	Active
	025b1106722ec997	Mr Santosh Ghosh [Hib...]						0	Active
	03a50049e9d51d86	Mrs Devan Islam [sury...]						9	Active
	049c849c745b7cf	Mr Shamsar Ansari [w...]					SM-G615F	0	Active
	054618803a9fa894	Mr Pradeep Meena [navadhar_Se7]	Android	Mservice	1.12.01	Xiaomi	Redmi Note 8	9	Active
	064c8e6cbe32cbe0	Mr Vishnu Prakash [hl_sa5]	Android	DPartner					Active
	0738ab0fa4549947	Mr Gururaj Patil [hms_sa3]	Android	DPartner					Active
	089adabfdafe804	Mr Yanshu Thakur [anchorse2]	Android	Mservice	1.13.01	samsung	SM-M307F	10	Active
	090bbe8aef36ceed	Mr Sanu Kumar Tiwari [surya_se9]	Android	Mservice	1.0.02	motorola	moto g(40) fusion	11	Active

Also, coordinator to de-activate old device-id having MService.

Though, technically MService and DPartner can co-exist in same mobile, it is suggested that engineer should un-install MService after DPartner starts working well.
