

Report A New Defect In Jira

Step-by-Step to Create a Issues:

In JIRA, a defect (or bug) is reported when an application or system does not behave as expected. To log a new defect, you create an issue under the **Bug/Defect issue type**. While reporting, you typically provide key details such as:

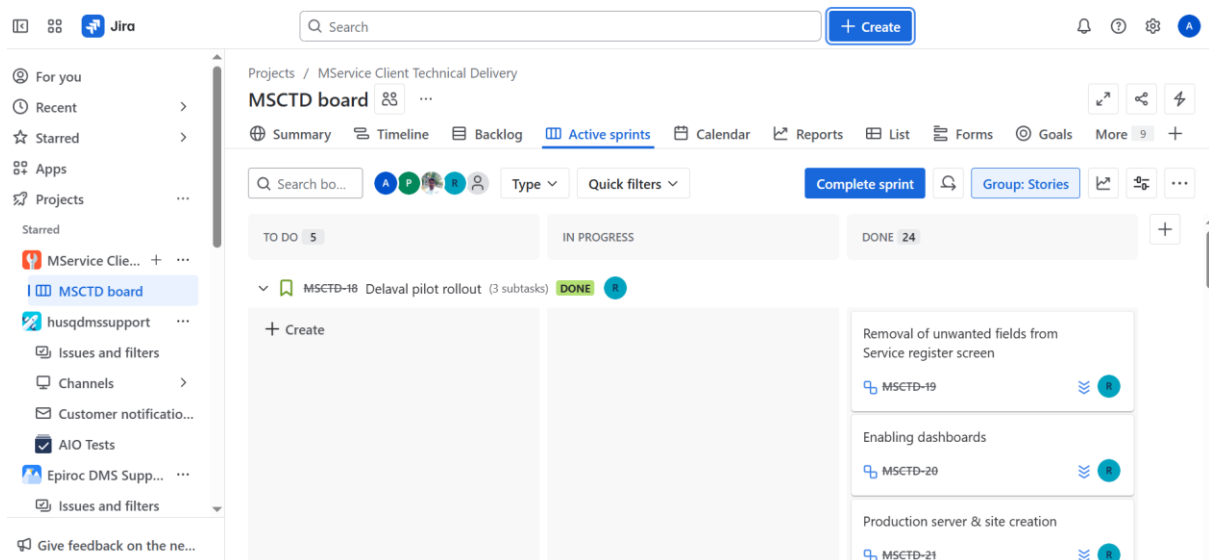

- **Project Name** – The project where the defect belongs.
- **Issue Type** – Select *Bug* or *Defect*.
- **Summary** – A short title describing the defect.
- **Description** – Detailed steps to reproduce, actual result, expected result, and any relevant information.
- **Priority/Severity** – To indicate the impact of the defect.
- **Environment** – Details about browser, OS, version, or test environment.
- **Attachments** – Screenshots, logs, or videos to help developers understand the issue.

Once submitted, the defect is tracked through the JIRA workflow (e.g., *Open* → *In Progress* → *Resolved* → *Closed*) until it is fixed and verified.

Procedure to Create a issues.

1st → login into Jira Tool.

2nd → Click into a Client, Which You want to create a Bug/issues.

3rd → Click into a +Create Issues.

4th → The page Should be Open issues Create Page.

Paste a Confluence link here, and we can help generate the description from the page's contents.

16th → fill the Linked work items.

17th → Select the option, Which is Related of bug.

The image shows two side-by-side screenshots of the 'New story' form. Both screenshots have a text area at the top with the placeholder text 'generate the description from the page's contents.' Below this is a 'Linked Work items' dropdown menu. In the left screenshot, the dropdown is open, showing a list of options: 'blocks', 'is blocked by', 'clones', 'is cloned by', 'duplicates', 'is duplicated by' (which is highlighted), 'implements', 'is implemented by', and 'reviews'. In the right screenshot, the dropdown is also open, showing a different list of options: 'blocks', 'duplicates', 'is duplicated by', 'implements', 'is implemented by', 'reviews', 'is reviewed by', 'causes' (which is highlighted), 'is caused by', and 'relates to'.

18th → Select Work Items.

19th → if we need to Check on Versions, we can add the Fix Version.

The image shows a screenshot of the 'New story' form. At the top is a text area with the placeholder text 'generate the description from the page's contents.' Below this is a 'Linked Work items' dropdown menu with 'blocks' selected. Below that is a 'Select work item' dropdown menu, which is open, showing a list of 'Open work items'. The list includes: 'CX-189 Warranty Validation_XE210I-370_Pravas Debata', 'CIRDELAVAL-38 Enabling Message Communication between Service Engineer and Customer in DeSCo app', and 'LG-216 Request to Make Feedback Mandatory and Grant Closure Access to Dealer Team'.

20th → We need to Fill the column Of Assigned.to be reviewd.
