

Report For Fiori Client Basic Understanding

FIORI Concrete Machines India Pvt. Ltd.

About

- The company manufactures and supplies advanced **concrete mixing solutions** including the **DBX (X-Generation)** and **DBS series** of self-loading mixers, designed for efficiency, safety, and ease of use.
- FIORI's products are widely recognized for enabling **on-site, on-demand concrete production**, reducing costs and environmental impact.
- FIORI Concrete Machines India Pvt. Ltd. focuses on **quality, innovation, and customer support**, aiming to deliver reliable construction equipment while maintaining international standards.

Establishment & Ownership

- FIORI Concrete Machines India Pvt. Ltd. is a **100% wholly owned subsidiary** of **Fiori Group S.p.A., Italy**, established in **March 2022** in India.
- They pioneered the concept of the **Self-Loading Mixer (SLM)** in **1965**, introducing innovative features such as the **swivel drum**.
- The Chennai facility is the only Fiori manufacturing plant outside Italy, located **near Irungattukottai, Sriperumbudur, Tamil Nadu**. It spans approximately 3 acres with 65,000 sq ft of covered production, sub-assembly, and spare parts storage space.

Available Models :

FIORI India manufactures a concise lineup of self-loading mixers tailored for the local market and global standards, including:

Front-Loading Mixers (DBX Series):

- **DBX 2500** and **DBX 5000**, representing the compact and efficient "X-Generation" line introduced in 2014 .

Rear-Loading Mixer (DBS Series):

- **DBS 4300**, following FIORI's long-standing design legacy dating back to the 1960s .

Online catalog confirms that three product models are actively offered:

- Front Loading Mixer DBX 5000
- Front Loading Mixer DBX 2500
- Rear Loading Mixer DBS 4300

Market Presence & Application:

FIORI machines have been operating in India for **over 25 years**, demonstrating strong market presence and recognition [FIORI Concrete Machines India](#).

Key application segments include:

- Concrete supplying
- Irrigation & water management
- Energy generation/distribution
- Government and military infrastructures
- Urban infrastructure and municipalities
- Foundations, railways, roads, tunnels, mining.

Model	Loading Type	Key Characteristics
DBX	Front-loading	Compact, X-Generation, high visibility
DBS	Rear-loading	Mobile, flexible, suitable for batching replacement

Summary.

FIORI Concrete Machines India Private Limited – Brief Overview

- **Company Name:** FIORI Concrete Machines India Private Limited
- **Industry:** Construction / Concrete Machinery
- **Description:** FIORI specializes in manufacturing and supplying concrete machinery, including mixers, pumps, and transit mixers, providing innovative solutions for construction and infrastructure projects.
- **Key Focus:** Innovation, reliability, and sustainable concrete solutions.
- **Global Presence:** Operates in multiple countries with after-sales support and technical services.
- **Popular Machines:** Concrete mixers, concrete pumps, transit mixers, and auxiliary equipment.
